

INSIDE ORO LOMA

New Carts Coming Soon

WHY
NEW
CARTS
NOW?

Sorting waste properly is good for the environment. Oro Loma is coming into compliance with the state law requiring uniform colors for waste carts.

Understanding the Requirements of SB 1383

With SB 1383, everyone in the State of California is required to sort waste properly. A major part of the new legislation focuses on keeping organics out of the trash. Oro Loma is revising the solid waste collection program to comply with the requirements of SB 1383. This includes updating public informational materials, container colors, labeling, etc. Should you have questions about SB 1383, please email info@oroloma.org.

What is Included in Organics?

The CalRecycle definition of "organic waste" includes food, green material, landscape and pruning waste, untreated wood, food-soiled paper.

It's Important to Know What Goes Where

OroLoma.org/sb1383-organics

What does this mean to Oro Loma customers?

ALL customers must subscribe to organics (green waste) and recycling services.

All organics and green waste must be kept out of the trash (landfill).

Potential penalties could be charged for not having the required services.

New carts, which comply with the state mandated colors, will be provided to customers.

*Oro Loma customers only.

Take the Super Sorter Quiz to Win!

Take our quiz (it's fun!) for tips on what goes where. All participants will receive a handy reusable shopping bag, and we will randomly select monthly winners* of the bluetooth noise-cancelling headphones.

From April 11 – June 13, 2022

How to Safely Dispose of Light Bulbs

Light bulb disposal varies depending on the type of bulb.

While incandescent and halogen lights can be safely disposed of in the trash, some lights are hazardous and require specialized disposal. Examples of hazardous lights include compact fluorescent lights (CFLs) and high intensity discharge lights (HIDs). These could be disposed at your local Household Hazardous Waste (HHW) or by using the Waste Management mail-in program called LampTracker at a cost. The cost varies depending on the size and quantity of lights being mailed in.

For more information visit:

BOARD MEETINGS

First and third Tuesdays of every month

Visit OroLoma.org for Board agendas

Check oroloma.org for updates on District responses to Covid-19.

TIP!

DON'T BAG YOUR RECYCLABLES!

Recyclables in plastic bags can't be handled by sorting equipment, so the recycling goes in the landfill with the trash. Not good!

FACT!

30% OF WHAT GOES IN THE TRASH IS ORGANICS – MOSTLY FOOD AND YARD TRIMMINGS.

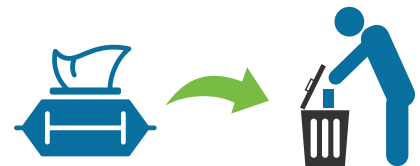

Put organics in the green cart, please!

FACT!

WIPES ARE A LEADING CAUSE OF SEWER

CLOGS. Don't flush them down the toilet.
