MANDATORY RECYCLING AND ORGANICS

Understanding the Requirements of SB 1383
Residents, businesses, schools, and government agencies must subscribe to recycling and organics collection services and keep recyclables and compostables from the trash (landfill). In addition to collection services and sorting properly, some food generating businesses are required to donate edible food. Jurisdictions are required to monitor contamination and provide contamination notifications with potential penalties.

To learn more about the State's waste sorting and service subscription requirements, visit:
www.calrecycle.ca.gov/Organics/SLCP/collection

To learn more about the State's contamination monitoring requirements, visit:
www.calrecycle.ca.gov/organics/slcp/collection/contamination

What Does This Mean for You?

- Everyone must subscribe to organics and recycling collection services.
- Recyclables and compostables must be kept out of the trash (landfill).
- Potential penalties may be charged for not complying.
- New carts, which comply with the state mandated colors and labels, were provided to customers.

KEEPING CLEAR OF CONTAMINATION

Don't let your recycling efforts go to waste.

Keep recyclables and compostables loose.
Recyclables in plastic bags may end up in the landfill. Keep them loose so they can be sorted at the sorting facility. Plastic bags can tangle up the sorting machines, which is dangerous to the workers. All plastic bags, even those labeled “compostable” or “biodegradable” are not allowed in the organics containers. These bags take too long to break down as your organics are quickly turned into compost at the WM facilities.

Keep hazardous material out of the collection service containers.
